

## APPLICATIONS

**Eni Chain Grease Spray** is a super-adhesive, penetrating, drip-proof and long-lasting spray grease for motorcycle chains, recommended for all types of chains even with O RING seals.

Designed for particularly critical conditions; after the nebulization penetrates in depth and in approximately 15/20 seconds it is fixed, remaining anchored to the surfaces forming a film of adhesive grease that remains for a long time without dripping and without detaching even in the presence of high centrifugal forces.

It is also suitable for open gears, hinges, chains, sliding rollers and mechanical guides of all kinds.

## CUSTOMER ADVANTAGES

- Super-adhesive, anti-drip, penetrating, long-life

## CHARACTERISTICS

Properties	Method	Unit	Typical
Appearance		-	clear
Colour		-	black
Base oil type	-	-	mineral
Propellant type	-	-	gpl
Solvent type	-	-	heptane
Density at 20°C	AIA 43.010	kg/m <sup>3</sup>	670
Viscosity at 40°C	ASTM D 445	mm <sup>2</sup> /s	60
