

eni i-Ride moto 10W-30

eni i-Ride moto 10W-30 is a lubricant with synthetic base-stock, developed for 4 stroke bike engines the latest generation. Is a product of high quality formulated to meet high performance levels.

The exclusive formulation of **eni i-Ride moto 10W-30** is able to resist at high stress conditions present in bike engines even multi valve.

The product provides full engine protection in all conditions, such as motorway or urban riding.

CHARACTERISTICS (TYPICAL FIGURES)

SAE Grade		10W-30
Density at 15 °C	kg/³	876
Viscosity at 100 °C	mm²/s	10.7
Viscosity at 40 °C	mm²/s	70
Viscosity at -25 °C	mPa·s	6800
Viscosity Index	-	140
Flash Point	°C	230
Pour Point	°C	-27

PROPERTIES AND PERFORMANCE

- The additive technology used in **eni i-Ride moto 10W-30** guarantees outstanding engine lubrication, at low and high temperatures. Therefore, the product can be used in all seasons.
- Perfect balance of additives package used to ensure excellent engine protection and outstanding performance of clutch and transmission.
